

ONLY FOR THOSE WHO COULD NOT MAKE

A PICTURE OF THE IMPERIUM OR USA

First, my message of condolence to the family of the late Dr. Boutros-Boutros-Ghali.

This highly educated person and who harbored the instinct of courage and justice in the face of those who looked unimpeachable, was a UN General Secretary one term only. For a UN General Secretary, one term is unusual. But, because Dr. Boutros-Ghali confronted the Imperium, USA, in the face of countless Injustices against the weak and the helpless, USA vetoed against his second term and was forced out of office.

For those of you who really do not know USA, Dr. Boutros-Ghali portrait the behavior of USA as follows:

They didn't want someone who would question their decisions. They wanted everything and everything at once! You know, when people have power... I have worked with absolute rulers all my life. They cannot accept discussion; they cannot accept even a minimum of contradiction. I want that! And that's all. What? You want to discuss the issue? I am the God of Gods, and I will have what I want. And you're saying that you would like to think about it for a while?

I wish if I could, be still more brutal than Dr. Boutros-Ghali. By posting on Dehai, the words of Dr. Bouros-Ghali, I hope, I have contributed something to tell to the readers about this monster of our time.
