We keep entertaining topics related to combating ignorance, disease and poverty. Today, we will, as part and parcel of our common objective, focus on economic development through investment. Dr. Berhe Habtegiorgis will give us presentation on the availability of investment opportunities as individual and joint venture or as stock owner of a corporation, thereby paving the road to a bright future. Nuggets of wisdom pertaining to communal and social matters can also be expected. Hence, we cordially invite you to participate in this seminar.
