

## **BEREKET HABTESELASSIE IS LYING AGAIN ABOUT THE 1997 UNENACTED CONSTITUTION**

By: Yemane Tsegay  
[September 16/2020]

Assena Tv has released a new video on September 10, 2020 in which Bereket openly said that: “the 1997 constitution is ratified then it must be enacted”. As far as he is concerned it must be enacted immediately and Isaias must be prosecuted under the current Eritrean Penal Code Of The State Of Eritrea of 2015 that states: “ Offences Endangering the Security of the State Article 112. - Treason. And Article 113. – “High Treason”.

This person is again fraudulently misleading the Eritrean public when he stated that comment about Isaias he really sounds like someone who never graduated from high School himself. Because, most people would know that the president has full discretionary power when it comes to enact or not to enact that constitution because the president has full right and obligation to protect the society from any deviant anti social behaviors, or any detrimental to social, cultural and economic difficulties that the nation could face; as well as protecting the territorial sovereign rights of the country including anything that prevents a tyranny of any kind to all its citizens, and so on and on.

Bereket is dead wrong when he quote: Article 112 and Article, 113 of the Eritrean Penal Code of 2015. Because, the 1997 ratified constitution is not enacted, thus it does not even exist in Eritrea today until the president signed it or until it is giving to the public as a referendum to vote for its dissolution.

It is my personal observation that this individual must have a huge disrespect to the Eritrean people. You Mister **stuttering**: you called Isaias that he needs a Psychiatrists to be evaluated if he is mentally competent, while you are exhibiting a brain disorder yourself when you repeatedly

sounds a single word of a stuttering speech always with Brocken words that sounds (Illlike). Let me tell you in advance: Eritrea is no more for sale like what has happened in 1952 when the wrong people such as the Unitarian that includes your father have agreed and some signed the 1952 so called a contractual agreement with Ethiopia a crooked deal that happened due to simply the “ignorance of law” by our fathers and brothers.

By the way, the masses of our people are saying that we don't want the 1997 ratified constitution and henceforth we want it to be dissolved in all of its forms.

When the right time comes the president will announce to the Eritrean people: vote on this foreign inspired constitution to make it null and void. The main reason for this was the Eritrean people had not got a chance to have the basic and complete understanding and acknowledgment of the legal content in the 1997 constitution as written in the master file which was later presented in English that was found to be a detrimental to the society. For example to quote from that ratified constitution: It allows to WARSHIP ANY RELIGION according to Article 19 (4) as well as it allows to PRACTICE ANY IMPROPER FACTORS legally according to Article 14 (2) that means any prostitution, drug use or any improper act is legally allowed.

The Eritrean public will have the opportunity to have a national referendum for the dissolution of that constitution to make it null and void once for all. The reason why we must dissolve that ratified 1997 unenacted constitution is because the former commission committee of the 75 none PFDJ members and the other 75 who are the PFDJ members of the constitution committee do not represent the 4 million plus Eritreans who are living in the country.

Bereket Habtesellassie please understand: that ratified constitution is in limbo and it is going to be a null and void by the public through a public voting mechanisms either directly through a national public voting or through indirectly voting by a newly publically selected representatives.

As a remainder to you Mister **Stuttering** the nation of Eritrea will charge you due to the crime inflicted on Eritrea that you defraud the nation for the last 27 years since your involvement within the Eritrean Government. The Eritrean people and the government have the right to recoup all the damages that have incurred so far caused by your criminal intent as well as the

Ethiopians are also looking for your other crimes, because you simply have blood on your hand you know it and you are going to deal with it.
