

To

US Embassy

Asmara Eritrea.

Dear Sirs,

This is to express my dismay at what the Biden administration and US embassy in Eritrea is doing against the Eritrean people. The main objective of any embassy is to create a conducive environment between two governments and people. Embassies should not be an alternative opposition group replacing the native people. Regime change should come from the people within. US regime change policy is undemocratic and against its interests.

Countries should have the right to choose which way they administer their countries and should not be forced other ways without the will of the people. Eritrea has been the victim of rough US policy for almost 80 years. Its policy has created too much suffering and sacrifice to our people. Now the people you are targeting are few and the economic and political sanction you are putting is harming the entire Eritrean people.

Why is the US government choosing to work with the terrorist TPLF group? It is incredible a country which preaches democracy and rule of law sides behind terrorist organization against democratically elected government.

Why is the US government trying to punish the Jan 6th 2021 rioters in the Capitol Hill? Had the US government tolerated if some groups exterminate even a few army barricades let alone thirty percent of its army. Look what you are trying to do to the rioters.

Why are you trying Eritrea from exercising its legitimate rights to defend itself? In the absence of the Ethiopian government protect its borders from terrorist organization which is treating now and then to capture Asmara, do

you want us to stay idle until they overrun our country? We are doing our duty around our borders. But why is the US going to Vietnam, Afghanistan, Syria, Iraq and other parts of the world claiming American interests are endangered. Why not Eritrea is not allowed to exercise her right to defend herself?

The Eritrean army is the most disciplined and tolerant army in the world. We know how much fabrication is done to blackmail our innocent soldiers. Look how it started in the name Axum massacre from Tigray born US citizen said 800 killed. Now and then it was reduced to less than 90. All those you are calming are independent investigator parroted the Tigray born fake allegations and all of them are well known sworn enemies of Eritrea.

TPLF treat to overrun Eritrea is there from day one and you can verify it from multiple interviews done by their warlords and their songs. In this case we have no choice except to defend ourselves. At the end what I want to tell you, it is not your duty to tell our government to leave Tigray. Tigray is not sovereign country. It is part and parcel of Ethiopia and it is the duty of Ethiopian government to tell others what to do.

Best Rgds
